Hi Louis and Doug:

I haven't received any responses from these emails, and the clock is ticking on this migration.

Today, I'm moving your web sites to the new server with the IP address of: 45.59.100.119

I'll migrate the web sites and use my own sub-domain names to test everything.

I'll email the new URL's for the sites when completed.

Whenever you are available to complete this migration by applying your own domain and sub-domain DNS settings, just let me know once the IP address for both:

https://techcelerate-ce.com/

and

https://radiology.techcelerate-ce.com/

have been updated in your Domain name DNS settings and I will apply the SSL certificate (HTTPS) to them both.

Have a wonderful day!

Best Regards,

Dennis Hall

Hi Doug:

I'm not sure if you are the person I should be reaching out to on this subject.

Please see my email below and if you can get in touch with Louis to let him know about this server change, that would be great.

The server change must be completed before 7 December, 2024.

Best Regards,

Dennis Hall

Subject: We're moving your techcelerate-ce and radiology sites to a new server

Hi Louis:

Hope the message finds you well.

I'll be moving your server containing your 2 WordPress sites to a new upgraded server.

Nothing will change in your web sites or in your hosting fees, as this move is a technical move I'm making to serve you better.

The server has the same specs as you currently have as far as memory, CPU's and disk space, however, the storage in the new server moves you from SSD disks to a faster KVM storage array of disks and your servers network interface cards move from 1GB to 10GB.

For this change to take effect, I've already migrated both your web sites files over, however, we'll need to get together in a Zoom meeting to coordinate the change of your domain name DNS IP address for the server.

This will ensure down time for the sites will be minimal (usually within 5 minutes from old site live to new site live).

Your current server will be shut down on 7 December, 2024, so we'll need to complete this migration prior to that day.

Please let me know a convenient day/time to meet so I can send you a Zoom meeting invitation for then?

Have a wonderful weekend!

Best Regards,

Dennis Hall

Hi Louis and Doug:

Your old server has now expired.

This means you can only currently access both web sites installed in it using the information I provided below in my last email.

Once you have a chance to update your Domain name DNS settings for both the domain and the sub-domain, please let me know and I'll install the SSL certificates for each site.

At that point, everything will be back to normal.

Have a wonderful weekend!

Best Regards,

Dennis Hall

Subject: RE: We're moving your techcelerate-ce and radiology sites to a new server

Hi Louis and Doug:

Your sites have been migrated to the following URL's as a temporary measure until you have time to replace the IP Address for the domain and sub-domain.

You can log into these sites using the same username and password you have previously used.

To log into each site, use the following URL's:

Main site: https://techcelerate-ce.learning-templates.com/wp-admin/

LearnDash LMS site: https://radiology.techcelerate-ce.learning-templates.com/wp-admin/

Once you have updated the IP addresses in your Domain hosting DNS settings, please be sure to let me know so I can apply the SSL certificates for each.

Do either of you have any objection to my shutting down your old server now?

This will mean if anyone is looking for techcelerate-ce.com or radiology.techcelerate-ce.com will get a "web site not found" message until you update the DNS records.

Have a wonderful week!

Best Regards,

Dennis Hall

We can do this any time since I'm capturing everything now.

The sites will not be found using your current IP address on Saturday morning, so we have until end-of-day Friday to update the DNS settings for the domain and sub-domain.

It's my understanding everything is still under development and from what I've seen, not much activity has happened in them for some time, so again, no rush.

Good luck with your surgery!

Best Regards,

Dennis Hall

Thank you Dennis. I had not seen this come through. I'm actually having eye surgery later this morning but should be able to update the DNS tomorrow or Friday. Will that be soon enough?
