Webinars

eManaged Webinars

Put your webinar setup and management in our capable hands and we'll deliver peace of mind, white glove service, attendee support and a live moderator.

We ensure your staff, presenters, and audience all have a reliable and engaging experience.

Engagement Webinar Services

Kick your virtual event up a notch with these premium service offerings. Utilize custom interactive lobbies, managed engagement breaks and attention checks and receive post-event engagement metrics.

eMonitored Webinar Services

Blue Sky also offers scaled-down webinar services for smaller events. Handle preparation and presenter training internally and we'll support you with live event facilitation and post-event services.

Our fully-managed solution includes:

Full-Service Facilitation + Support

- Live introduction & moderation
- Live technical support for participants
- Reliable back-ups and redundancy
- Problem-free high volume log-ins
- Sophisticated polling and live event tracking

Dedicated Event Manager

- Event planning & setup support
- Registration site creation
- Speaker training
- Event facilitation & quality assurance review

Post Event Services

- Event recording published to your site or your Path LMS
- Post-event analysis and participation reporting
- Detailed event engagement metrics
- Ecommerce integration to monetize your event content

Post Production

- Convert virtual event content into on-demand learning modules
- Create visually dynamic education experiences
- Customize with your event-specific branding
- Synchronize slides and other supporting media

Webcasts

Webcasts & Hybrid Meetings

Let our live streaming technology experts handle your technical needs so you're free to focus on your message. Use our full-service production crew or your own on-site production infrastructure to smoothly and seamlessly broadcast your live event, annual conference or meeting and enable real-time remote audience interaction from anywhere around the world.

Full Service Webcast+

Includes everything listed with our full-service remote webcasts, as well as onsite media production, including videographers, technicians, and event moderators. Blue Sky will also provide the necessary equipment to meet your onsite needs. Lastly, our team will also coordinate and integrate with existing A/V vendors and infrastructure and provide complete live event facilitation.

Flexible Event Production and Delivery Features

Event Production

- Event registration set-up & automated workflow
- Automated event notifications
- Back-ups and technical redundancy to assure reliability
- Event archival for automated conversion to on-demand
- Full webcast monitoring to ensure reliable delivery
- Premium Content Delivery Networks (CDN) included
- Works seamlessly with software and hardware video encoders

Webcast Features

- Synchronized media & multiple content formats
- Flexible attendance monitoring, for CE compliance
- Audience engagement through Q/A, polling and notes
- In-console live chat and technical support for remote attendee participation
- Translation & closed-captioning services
- HD quality video for professional broadcasting
- Adaptive streaming, for learner ease of use
- Mobile-first player, with automatic device detection
- Configurable player options, for optimal learner experience
