UNCANNY AUTOMATOR
WORDPRESS PLUGIN

Welcome to Automator

You’re minutes away from creating your first recipe. To get the most out of Automator, we have some helpful tips for getting started and making sure Automator works perfectly on your WordPress site.

Hi Louis,

Congratulations on your Uncanny Automator purchase!

We're really proud of this product and we want to make sure you’re happy with your purchase and get lots of value out of it. We have a few tips to help you get started, and if you have any questions or feedback, make sure to let us know on https://automatorplugin.com/!

Getting Started

Your purchase confirmation email includes important links and information for setting up Uncanny Automator. You'll want to have that handy as you get started.

To install Uncanny Automator:

1. Make sure that your site is using PHP version 7.0 or higher.
2. Install the free Uncanny Automator plugin from first. You can do this by navigating to **Plugins > Add New** in /wp-admin/ and searching for (and then installing) "Uncanny Automator", or you can download it from WordPress.org or install it from the Add Plugins page on your website. Make sure to activate the plugin after installation.
3. Download Uncanny Automator Pro from the confirmation email or from inside your account on our website.
4. Upload the Pro plugin(s) by navigating to **Plugins > Add New** on your site as an admin. Click the **Upload Plugin** button at the top and complete the upload process Pro (after the free version is installed and active). Activate the plugins after upload. If you prefer to upload by FTP, unzip the files and upload them to the /wp-content/plugins/ folder. (Please don't change the names of the plugin folders.)
5. Activate your license key by visiting **Automator > License Activation** and entering the key from your email or account page.

Need Help?

The Uncanny Automator Knowledge Base is your best resource as you start using the plugin. It's always kept up to date with the latest release information and has the most comprehensive guidance available.
