Is Uncanny Automator updated regularly?

We think so; we've released over 20 updates to the free version and Pro in the last 5 months, including dozens of new integrations, triggers, actions, tokens and features. During the lifetime sale we will have a code freeze, but in about 3 weeks we'll have a big new release.

Is there a real company behind Uncanny Automator?

There certainly is! Uncanny Owl, creators of Automator, have been in the WordPress business for over 7 years and have thousands of paid customers for our other WordPress plugins. We're well known in the WordPress elearning space.

How is this different than Zapier?

While Zapier is a powerful service that interconnects SaaS apps, Automation Plugin interconnects WordPress plugins, WordPress websites, and SaaS apps that send or receive webhooks. Read a full comparison at https://automatorplugin.com/how-is-automator-different-than-zapier/.

Can Uncanny Automator replace Zapier?

In many cases it can, but not all SaaS apps are able to send and receive webhooks. In these situations, Zapier integrations that Automator cannot. In these rare cases, Zapier (or a similar service, like Integromat) may be needed for part of your automation tasks, but since additional tasks can be offloaded to Automator, your Zapier usage will decrease.

All plugins along with their triggers and actions are listed here: https://automatorplugin.com/all-triggers-and-actions/. If it's not in that list, we don't currently support it. We are happy to consider new integration requests; you can submit product ideas at https://automatorplugin.com/feedback/.

WP Fusion and Groundhogg are fantastic plugins with a focus on marketing automation, membership and CRM capabilities. Many users will find the most value in using WP Fusion or Groundhogg in combination with Automator (if you require marketing automation and CRM capabilities).

Can I add and remove sites using my license?
