Experience

Freelance Medical Writer

Self-Employed

Dec 2013 – Present 4 yrs 8 mos

Greater New York City Area

I draw upon my medical communications, pharmaceutical marketing, and medical affairs experience to develop strategic and compliant presentations/publications supporting my clients' medical objectives throughout all FDA development phases.

I have developed a variety of disease-state and promotional activities for pharmaceutical, medical education, and publishing companies, including the following:

• Disease-state monographs, eg, Alport Syndrome (Reata Pharmaceuticals).

• Local Insight® promotional manuscripts for distribution to regional physicians. Local Insight® manuscripts consist of one core educational manuscript and vary regionally due to regional quotes from key opinion leaders, eg, Lucentis® (ranibizumab injection) for diabetic retinopathy (Genentech); Xulane®: A Non-invasive Contraceptive Option that Doesn't Require a Daily Pill Routine (Mylan).

• Promotional and disease-state roundtable videos, eg, Primary Care Perspectives on Hepatitis C Virus Screening, Diagnosis and Linking Patients to Appropriate Care (Elsevier Multimedia Publishing); Treatment of Newly Diagnosed HR+/HER2− Metastatic Breast Cancer in US Community Oncology Practices in the New Era of Targeted Therapies (Pfizer).

• Competitive Intelligence/Research, eg, immuno-oncology / adoptive cell therapy (ACT) CI/research. I worked with Tactiva Therapeutics to develop their strategic focus and promotional messages for their "next generation" ACT strategies.

Freelance Partner/Co-owner

Klast Medical Consulting, Inc

Dec 2013 – Present 4 yrs 8 mos

119B Fenimore Road, Mamaroneck, NY

Klast Medical Consulting Inc. is a small freelance operation aimed at providing medical communications agencies and pharmaceutical companies with comprehensive, full service, medical communications support. We are able to provide intimate strategic services due to our established collaborations with experts in a number of fields such as web site design, A/V services, and biostatistics.

We pride ourselves in our ability to conduct in-depth assessments of the complex business challenges facing our clients, which really enables us to implement a variety of novel and proven tactics to obtain valuable insights, including key opinion leader interviews and target audience surveys.

To learn more about how we can help you, please call or email me, Stephen Strudwick, PhD, to schedule a meeting (914 719-5493, SStrudwick@KlastConsulting.com). I look forward to hearing from you!

Charlotta Norgaard
President & CEO, Patient Expert Consultant, and Patient Relations Manager
March 30, 2011, Charlotta worked with Stephen in different groups

Stephen is one of the most knowledgeable people I have ever worked with in this industry. He is a wealth of information and knows something about every disease and medication I have ever asked about. Stephen is always looking for opportunities to assist his team and willing to provide valuable feedback whenever needed. I enjoy working with Stephen.

Donald R. Newland

Stephen is an expert at providing holistic communication solutions and has been invaluable for bridging our commercial messaging

Communications Manager at Anthem - West Region

January 21, 2011, Donald R. was a client of Stephen's

with the supportive science content. He is an exceptional partner and offers realistic and workable ideas that often exceed expectation. It's truly been a pleasure.

Liz Kramer
Senior Regional Medical Liaison at Amgen

January 21, 2011, Liz was a client of Stephen's

Stephen's medical content work is far better than any other service provider I've worked with in this category, particularly his writing. Exceptional.

Mario R. Nacinovich Jr.
Managing Partner at AXON

January 4, 2010, Stephen worked with Mario R. in the same group

Dr. Strudwick is an prodigious strategist and subject matter expert in medical communications. I have had the pleasure of working alongside him across several clients and pitch opportunities. He is the consummate team player and tackles monumental scientific tasks with a simple, straightforward approach.

Accomplishments

3 **Publications**

Differential transcription-coupled translational inhibition of human p53 expression: a potentially important mechanism of regulating p53 expression in normal versus tumor tissue Finding a role for PML in APL pathogenesis: a critical assessment of potential PML activities. The emerging roles of translation factor eIF4E in the nucleus.
