** Meets requirements in all states except CA, WA, DE & TX. However, you can still take the course to learn.*

Need to Know About CEUs

What is a CEU?

CEU is short for "continuing education unit." Most nurse aides in the U.S. are required to have at least 12 CEU inservice hours per year in order to renew their registration. Each In the Know module offers one hour of continuing education (the same as one CEU).

How do the online training courses work?

Simply select a CNA CEU course that you'd like to learn more about. Complete the interactive module to learn the material. At the end of each module, you will be invited to take a quiz. After successfully completing the quiz, you can download a certificate to show employers that you have earned the CEU. Additionally, if you're looking for a job and have completed a job application on myCNAjobs, the course will automatically be added to your caregiver resume so you can bring it along to interviews! If you are not in need of CE credit at this time, you may still complete as many modules as you like. As a healthcare worker, it's always great to learn something new!

How long does it take to complete an In The Know module?

You can choose to go through the CNA e-learning modules as slowly as you'd like. Typically, each CEU course takes approximately an hour to complete the interactive module and take the quiz.

What if I don't pass my quiz the first time?

No worries! You can go through the learning modules as many times as you'd like and your quiz will be available to retake at your convenience when logging into your myCNAjobs account.

When do I get my CNA CEU certificate?

After completing each course you will be directed to download your certificate directly from myCNAjobs.com.

How are the CNA CEU courses developed?

The courses available through myCNAjobs are developed by the registered nurses at In The Know, especially for nursing paraprofessionals. In The Know is an approved CNA continuing education provider. Each course meets state requirements for 1 CNA CEU in 46 states.
